

Guest Editorial

Evelyn Ai Lin Teo, National University of Singapore

This section contains upgraded versions of a set of selected papers originally published at The CIB W099 International Conference on "Modelling and Building Health and Safety", which was organised and hosted by the Department of Building, National University of Singapore 10 -11 of September 2012. The focal objectives of this section are to explore the integration and application of new techniques, technologies and strategies towards attaining verifiable improvements in occupational safety and health in construction.
