Editorial	1
<i>Jurgen Schulte</i>	
Reviewing the relationship between thermal reservoir parameters and geothermal energy output	2-21
<i>Jamie Grippi</i>	
Wastewater and Mixed Microbial Consortia: a metastudy analysis of Optimal Microbial Fuel Cell configuration	22-36
<i>Jonathon Ryan, Hayden Ferral-Smith, Joshua Wilson</i>	
Evaluating Algae as an Alternative Fuel for Chemical Looping Combustion	37-55
<i>Catherine Williams, Sam Bentley, Chris Peramatukorn, Hamza Rafi</i>	
The Effects of Nanoparticles on the Specific Heat Capacity of Molten Salts	56-65
<i>Alexander Foldi, Duy Khang Simba Nguyen, Yeong Cherng Yap</i>	
Optimisation Principles for Photovoltaic/Thermal Hybrid Solar Systems, a Meta Study	66-79
<i>Richard Shin, Jose Regis Salcedo, Cheng Min Wang</i>	
Using photonic cooling systems to improve the efficiency of photovoltaic cells and their means of electricity production	80-88
<i>Alice Gordon, Ben Cross, Oliver Evans</i>	
Impact of Nanofluids and Specific Frequency Absorbers in Parabolic Trough Collector Solar Furnaces	89-103
<i>Genevieve Geehan, Ritika Ritika, Coen Winchester</i>	
A Meta Study on the Implications of Thermoelectric Generation on Hybrid Photovoltaic Systems	104-118
<i>Jamison Ghinis, Clifford Leslie</i>	
A comparative analysis on the impact of salinity on the heat generation of OTEC plants to determine the most plausible geographical location	119-130
<i>Bradley Lynn, Alexander Medved, Timothy Griggs</i>	
Analysis of Thermodynamic Properties of Cu(In,Ga)Se₂ Thin-Film Solar Cells for Viable Space Application	131-149
<i>Declan Clarke, Rodrigo Breguel</i>
